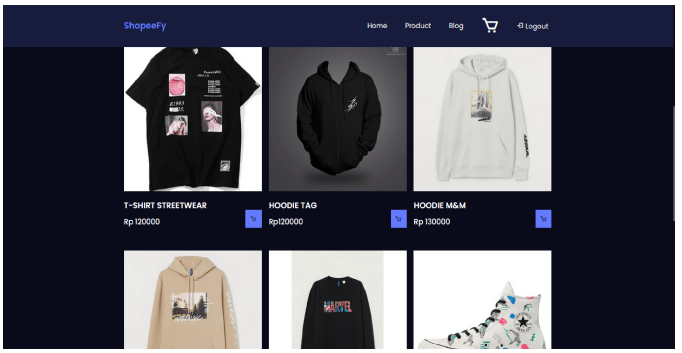
Projects

Web Company Profile

I created a web profile for a caring organization called bsipeduli. By using HTML and with the help of the CSS framework, materializeUI

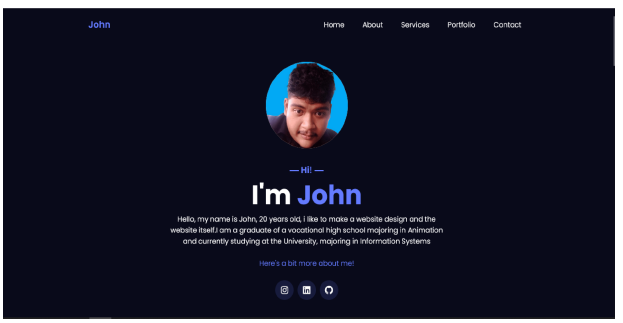
https://bsi.bsipeduli.repl.co/



E-Commerce Store

I created an online store website with several features, such as adding items to the cart, CRUD features, a login system, and the ability to create an account that is connected to the database. Using HTML, CSS, JavaScript, and PHP.

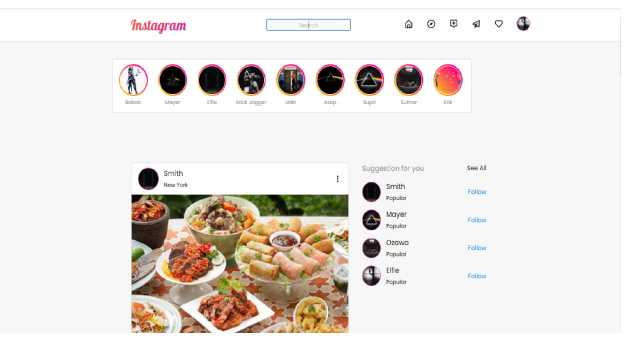
http://kelompok.unaux.com/homepage/index.php



Portfolio Website

I created a portfolio website for myself, which is very useful. Connected to the emailjs API, when someone sends a message on the website, it will go to my personal email.

https://johnfgb.github.io/



Clone Instagram

I used only HTML and CSS to create a copy of the website's home page and the Instagram login page.
